

Lim Dong Xian

Address: 321B Anchorvale Dr, Sengkang, Singapore, 542321

Nationality: Singapore Permanent Resident

Contact Number: +65 96533315

Email: limdongx@gmail.com

EDUCATION

Bachelor of Information Technology (Distinction)

[James Cook University Singapore]

[GPA:5.98 / 7.00]

[Graduated: July 2026]

- **Relevant coursework:**

- Major [Information Technology (focus: Cybersecurity & Software)]
- Minor [Game Design & Technologies]

- **Awards & Honours:** 1st Place, Design Sprint Competition (TR3 2024 & TR2 2025) – Led team to develop innovative solutions under time constraints; recognised for originality, analytical decision-making, effective feedback integration, and persuasive stakeholder presentations

Professional Diploma in Game Engine and Development

[Southern University College Malaysia]

[Graduated: Mar 2022]

- **Relevant coursework:** 3DS MAX Modelling Technique for Game Props, PBR Texture Design (Substance Painter), Unreal Engine Material Editor Workflow, Unreal Engine Level Design and Lighting, VFX Game Effect for Unreal Engine

PROFESSIONAL EXPERIENCE

Conser-vision: Wildlife Image Classification

Jupyter Notebook

Deep Learning with ResNet101 & FastAI

- Engineered ResNet101 model classifying 8 wildlife species across 4,464 test images, reducing competition log loss from 1.7160 to 1.3891
- Used StratifiedGroupKFold validation (5 folds) to prevent data leakage across locations.
- Applied data augmentation and Label Smoothing to improve generalisation on an imbalanced dataset.
- Optimised training with fine-tuning and Test Time Augmentation (TTA), achieving 51.3% validation accuracy.
- Documented model performance and hyperparameter strategies for reproducibility and robustness.

Nutrient Tracking Web Application

Python, Django, SQLite, OpenFoodFacts API

- Designed and developed a full-stack web application using Django following the MVC (MVT) architecture.
- Integrated the OpenFoodFacts API to retrieve real-time food and nutrition data.
- Implemented user authentication, profile management, and database models using Django ORM.
- Developed backend logic to calculate personalized daily nutritional requirements based on user attributes.
- Created responsive web pages with HTML, CSS, and Django Templates, enabling food search, nutrition tracking, and food comparison.

AutoLyricsApp (Personal Project)

C++, Python, WinRT, SyncedLyrics

- Windows application that automatically detect and displays synchronised lyrics on currently playing music.
- Used the Windows Media Control API to detect active media sessions and obtain playback metadata.
- Integrated Python-based lyric retrieval using the SyncedLyrics library with a native C++ frontend through inter-process communication.
- Implemented LRC parsing and real-time lyric synchronization based on song playback position.

EXTRACURRICULAR & LEADERSHIP

Design Sprint Competition Team

James Cook University Singapore

Subleader of the team

TR3 2024 & TR2 2025

- Assisted in leading a team to develop innovative solutions under time constraints in university-wide competitions.
- Contributed to achieving 1st Place out of 30+ teams; originality, analytical thinking, and persuasive presentations.

SKILLS & ADDITIONAL INFORMATION

- **Technical:**

- **Programming & Development:** Python, C++, HTML/CSS, Django, Kotlin, Git
- **Cybersecurity & IT:** Network Security, Cloud Computing, Behavior Cybersecurity
- **Data Analysis & Tools:** Data Mining, Database Modelling, MySQL, Python (Jupyter Notebook)

- **Game Development & 3D Design:** Unreal Engine, Godot, 3DS MAX, Maya, Substance Painter, Photoshop (Textures & Matte Painting), VFX Effects, Megascans, PBR Material Design
- **Languages:**
 - Chinese (Native)
 - English (Professional Proficiency)
 - Malay (Conversational)
